Date: April 14, 2008

Dear

Per your request, this letter is to inform you of all planned herbicide use for this year on the Central Coast Ranger District – Oregon Dunes National Recreation Area of the Siuslaw National Forest. All Planned herbicide treatments will focus on gorse control in the Baker Beach/Cape Mountain area approximately 7 miles north of Florence, Oregon. All herbicide treatment areas will be signed prior to treatment and signs will remain in place for at least two weeks after treatment has been completed. The following locations are planned for treatment

Location	Target plant	Herbicide	Time period	Approx. Acres
Baker Beach Area				
Dune Areas	Gorse	Glyphosate (Aquamaster)	July-Aug	55
West of Hwy 101	Gorse	Glyphosate (Aquamaster)	July-Aug	10
North of Sutton Ck.	Gorse	Glyphosate (Aquamaster)	Late Sept.	15
Cape Mountain Area				
Nelson Ridge	Gorse	Glyphosate (Aquamaster)	July-Aug	1

All planned treatments will be spot applications applied directly to target plants using ground application methods (backpack or tank with hose and hand-held spray wand). No herbicide treatments are planned on the Oregon Dunes National Recreation Area this year. No aerial application is planned this year or anticipated in future years. If you have any questions, please contact Dan Segotta, our Operations Staff, at 541-563-8446.

Sincerely,

for
PAMELA J. GARDNER
