Re: Written Plan for 2007 Operations

Seneca Jones Timber Company herein submits a written plan for operations near a resource protection area. In accordance with the Oregon Forest Practices Act, these operations shall provide equal or better protection for the environment while enhancing effectiveness of forest management operations and achievement of the desired future condition. This written plan is based on the following information:

Type of Operation:	Big Game Repellent Application		
Unit:	<u>Gimple Hill</u>	<u>T18S, R4W, Section 16</u>	<u>41 acres</u>
Reason for Plan:	Operation within 100' of type 'F' class stream		

Information:

A tributary to Spencer Creek flows adjacent to Seneca's treatment area through the center of Seneca's treatment units. This specific resource protection area is identified on the attached map. This stream is classed as a small, 'F' or fish-bearing stream, in this area. Seneca plans to apply big game repellent on individual seedlings adjacent to the indicated watercourse but no closer than 10 feet. This will allow the buffer to protect the stream from any potential drift or error of application. This big game repellent operation will utilize Plantskydd for repelling deer and elk browse.

The protection of this stream zone will be ensured by Seneca's continued dedication to the proper application of repellents through the following practices. The on-site Seneca representative will perform a pre-application review to delineate unit boundaries and resource protection areas with applicator. These stream zone protection measures are consistent with best management practices and will not affect any of the existing required components of the riparian management zone.

In closing we believe these measures will benefit both the environment and the operations of Seneca Jones Timber Company. If there are any concerns or more appropriate measures to be considered, please telephone our office at 541.461.6245. Otherwise, we will anticipate your approval of this measure and proceed as indicated during our operations.

Sincerely,

Mike Emmons

This written plan is based on the following information:

Type of Operation:	Big Game Repellent Application	
Unit:	<u>South Camus 02&34</u>	<u>T20S, R4W, Section 02</u>
Reason for Plan:	Operation within 100' of type 'F' class stream	<u>47 acres</u>

Information:

Hawley Creek flows into the north half of Seneca's treatment area through the unit. This specific resource protection area is identified on the attached map. This stream is classed as a small, 'F' or fish-bearing stream, in this area. Seneca plans to apply big game repellent on individual seedlings adjacent to the indicated watercourse but no closer than 10 feet.
