ODF Western Lane Forest Protection District

Re: Written Plan for 2007 Operations

Seneca Jones Timber Company herein submits a written plan for operations near a resource protection area. In accordance with the Oregon Forest Practices Act, these operations shall provide equal or better protection for the environment while enhancing effectiveness of forest management operations and achievement of the desired future condition. This written plan is based on the following information:

Type of Operation:	Manual Herbicide Application
Unit:	Gimpl Hill
Legal Description:	T18S, R4W, Section 16/31
Unit Size:	700 acres
Reason for Plan:	Operation within 100' of Small, 'F' class stream

Information:

A tributary to Spencer Creek flows through the Gimpl Hill Spot Spray treatment area. This specific resource protection area is identified on the attached map. This stream is classed as a small, 'F' or fish-bearing stream, in this area. Seneca plans to apply herbicides adjacent to, but no closer than 10', of the indicated watercourse, allowing this buffer to protect the stream from any potential drift or error of application and maintain shade on the watercourse. Therefore, Seneca will not directly apply herbicides in the buffer zone. This manual application primarily for control of woody brush vegetation and hardwood sprouts.

The protection of this stream zone will be ensured by Seneca's continued dedication to the proper application of herbicides through the following practices. Prior to application a Seneca representative will relay the information included in this written plan to the applicator. This information will include a thorough review of the stream zone and the 10' no spray buffer zone as well as property line locations. Prior to and during the application period the applicator will take continuous weather measurements to assess risk and continued plan success. These stream zone protection measures are consistent with best management practices and will not affect any of the required components of the riparian management zone.

In closing we believe these measures will benefit both the environment and the operations of Seneca Jones Timber Company. If there are any concerns or more appropriate measures to be considered, please telephone our office at 541.461.6245 respectively. Otherwise, we will anticipate your approval of this measure and proceed as indicated during our operations.

Sincerely,

Mike Emmons
