Mr. Dan Menk
Forest Stewardship Forester
Western Lane District
Oregon Department of Forestry
P.O. Box 157,
Veneta, OR 97487

Dear Dan,

This written plan will insure the protection of Salt Creek and the small fish creek west of Salt Creek in the NESW, NWSW, SWSW of Section 2, T185, R7W and the SESE of Section 3, T185, R 7W.

Hack & Squirt applications will be made to some scattered hardwoods competing with crop trees throughout the property. No applications will be made closer than ten feet to the high water mark.

Foliar applications will be made to Scotch Broom, blackberry and other plants to open roads and maintain access as well as to Scotch broom under the powerlines. No applications will be made closer than ten feet to the high water mark.

The fire trail we are constructing along the railroad tracks is being done by hand and with the use of power saws. It will not be built within 10 feet of the high water mark where it crosses the creeks.

The domestic water source is on Oregon Department of Forestry land and is a non registered use. Hack and squirt is the only activity planned in this area and it will be done downstream of the intake pipe. The small water course is non fish.
