Written Plan for Aerial Herbicide Application

Protected Resource: Hawley Creek Tributaries, small streams, assumed to have fish.

Location: Kester Ranch, Section 1 20S, R5W & Sections 6 & 7 20S, R4W

I'm writing with regard to our plan to apply site preparation herbicides on forestland adjacent to the small, assumed fishbearing streams referenced above.

Oust-Extra will be applied by helicopter for site-preparation control of blackberry and grass according to EPA label requirements. Garlon will be applied by backpack spray for seedling release from scotch broom competition.

In aerial application areas, all streams will have a flagged, 60 foot buffer that will not be sprayed. The helicopter will fly parallel to the streams when applying alongside buffer strips.

In backpack application areas, all streams will have flagged, 25 foot buffers that will remain unsprayed.

Please let me know if we need to take any other precautions.

Sincerely,

Scott Ferguson
