Written Plan

UNIT: 2007 Site Preparation Spray

LANDOWNER: Plum Creek

OPERATOR: Western Helicopter

PLANNED OPERATION: A spray operation is scheduled for the summer and fall of 2007 and will be completed by October 25th 2007. The spray is designed to reduce the competing vegetation in the plantation in order to allow the trees to reach green-up. The project will be completed using a helicopter and ground crew. Plum Creek will provide a representative to review and explain all portions of this plan to the operator before they begin work.

TARGET VEGETATION: Woody and herbaceous plants.

PROTECTED RESOURCES: See attached unit maps for protected streams and water systems.

The helicopter will not fly over any known active *Strix occidentalis* or *Brachayramphus marmoratus* Sites.

PROTECTION MEASURES: The following measures will be taken to protect all Fish, Domestic, Small, Medium and Large non-fish streams:

1. Spray will not be directly applied to any small non-fish streams by helicopter or ground crews. A 60-foot buffer will be left unsprayed by the helicopter along Fish, Domestic, Medium and Large non-fish streams regardless of cutting boundaries. A 10-foot buffer will be left unsprayed by ground crews along all Fish, Domestic, Medium and Large streams regardless of cutting boundaries.
2. Operations will not be performed if wind direction or velocity is such that protected water resources are in danger of contamination.
3. All operations will be performed in accordance with the Oregon Forest Practices Act as they relate to the use and handling of chemicals.

Donald Irons
Sr. Resource Forester
