

State of Oregon
Department of Forestry / Department of Revenue
Notification number: 2007-781-51035 [78127923] Congdon Corner

Attached is the processed information from the Notification of Operation and/or Application for Permits.

Please review this information and retain for future reference.

[X] - Notice is given to the State Forester that an operation will be conducted on the lands described herein (ORS 527.670).

[X] - A permit to operate power driven machinery is issued for the lands described herein (ORS 477.625)

[X] - A notice is given to the State Forester and the Department of Revenue of the intent to harvest timber (ORS 321.550).

n

I. WHERE TIMBER HARVESTING IS PART OF THE PROPOSED OPERATION:

District: **Western Lane**
Office: **Veneta**

County: **Lane**
WOSTOT:

Received by ODF on September 18, 2007 by fax

15 DAY WAITING PERIOD REQUIRED

**** Waiver Requested ****

II. WRITTEN PLANS:

- []** - A WRITTEN PLAN may be required before certain activities can commence on the Operation.

A WRITTEN PLAN may be required for the situations indicated by an **[X]** below. A WRITTEN PLAN must be submitted or a WRITTEN WAIVER must be obtained from the State Forester before any portion of the operation may commence.

- [X]** - Within 100 feet of a large lake or Type F or Type D stream.
[OAR 629-605-170(1)(a)]
- []** - Within 300 feet of a wildlife resource site listed in the 1984 ODF/ODFW Cooperative Agreement. [OAR 629-605-170(1)(b)]
- []** - Within 300 feet of any resource identified in the Divisions 645 or 665 of the administrative rules. [OAR 629-605-170(1)(c)]
- []** - Within 300 feet of a state or federally listed threatened or endangered wildlife resource site. [OAR 629-605-170(1)(d)]

Please contact the Oregon Department of Forestry forester named on the Unit Information sheet for further information on requirements that may be necessary to meet before any activity/operation begins.

Signed by **Jim Neef** - representing the Land owner.

Mr. Paul Clements
Stewardship Forester
Oregon Dept. of Forestry
87950 Territorial Hwy.
Veneta, OR. 97487

Dear Paul,

In order to meet the requirements of the Oregon Forest Practices Act, Section 629-605-170, Weyerhaeuser submits the following plan for operation within 100 feet of type F streams.

Operation: Timber Harvest (clear cut)

Unit Name: Congdon Corner

Location: E ½, Section 28, T. 15S., R. 7W.

Protected Resource: Small, medium fish streams, tributary to Congdon Creek.

Narrative: In this operation Weyerhaeuser will harvest a unit that has a medium fish stream as the western boundary (tributary A) turning to a small fish stream (small fish tributary A) and a secondary small fish stream (tributary B). Medium fish trib. A is approximately 1600' feet in length. Basal area requirements were not met and a variable-width buffer is flagged with pink "wildlife" ribbon tied with blue and white candy-striped ribbon. This buffer will retain all conifer within 70' of the high water level (HWL), all hardwood within 30' of the HWL., and all trees leaning over the channel. Small fish trib. A runs approximately 1100' through the unit, met basal area requirements, and a variable-width buffer is flagged with pink "wildlife" ribbon tied with blue and white candy-striped ribbon. Small fish trib. B runs approximately 700 feet through the unit. Basal area requirements were not met on the east side. A variable-width buffer is flagged with pink "wildlife" ribbon tied with blue and white candy-striped ribbon. This buffer will retain all conifer within 50' of the HWL, all hardwood within 20' of the HWL., and all trees leaning over the channel. Basal area requirements were met on the west side of small fish trib. B. A variable-width buffer is flagged with pink "wildlife" ribbon tied with blue and white candy-striped ribbon.

Cutting: Felling will be done in a manner that minimizes damage to trees and vegetation retained in the buffers. Conifer trees within a tree length of the posted buffers will be felled parallel to, or away from the buffers. Because of safety concerns, hardwoods may be felled in the direction they lean. Hardwoods felled into the stream channel or RMA will be bucked and yarded in such a manner that minimizes additional disturbance to the

RMA and/or stream channel. If individual trees or snags required to be retained within the RMA need to be felled for safety reasons, when possible they may be directed toward the stream channel and left in place where they fall.

Harvest operations: A skyline yarding system that uses a slackpulling carriage will be used when yarding lines cross fish streams. All cable road changes will be made by respooling and restringing to the next tailhold. If yarding lines through the buffer require trees to be cut for safety reasons, the width should not exceed 10 feet on each side of the skyline location, and all cut trees will be left within the RMA. If logs are yarded over fish streams, full suspension will be required to minimize damage to the stream banks.

Site Preparation: Machine piling of slash and brush may occur on slopes less than 40% and within the RMAs. Ground disturbance will be minimized within the RMA and all machine activities with slash piling will be greater than 10 feet from the high water line. Slash accumulations will be piled away from trees retained in the buffers to minimize heat damage when they are burned.

We are confident that with the help and cooperation of all concerned, this plan will achieve the objectives of the Forest Practices Act. If you have any questions regarding our plan, please give me a call at 744-4612.

Sincerely,

Jim Neef
Engineer
