**Written Plan**

**UNIT:** 2009 Spring Spray *JONES CREEK*

**LANDOWNER:** Plum Creek

**OPERATOR:** Western Helicopter

**PLANNED OPERATION:** A spray operation is scheduled for the spring of 2009. The spray is designed to reduce the competing vegetation in the plantation in order to allow the trees to reach green-up. The project will be completed using a helicopter and ground crew. Plum Creek will provide a representative to review and explain all portions of this plan to the operator before they begin work.

**TARGET VEGETATION:** Grass and other herbaceous plants.

**PROTECTED RESOURCES:** See attached unit maps for protected streams and water systems.

**PROTECTION MEASURES:** The following measures will be taken to protect all Fish, Domestic, non-fish, Small, Medium and Large streams as well as significant wetlands:

1. Spray will not be directly applied to any small non-fish streams by helicopter or ground crews. A 60-foot buffer will be left unsprayed by the helicopter along Fish, Domestic, Medium and Large non-fish streams as well as significant wetlands regardless of cutting boundaries. A 10-foot buffer will be left unsprayed by ground crews along all Fish, Domestic, Medium and Large streams as well as significant wetlands regardless of cutting boundaries.
2. Operations will not be performed if wind direction or velocity is such that protected resources are in danger of contamination.
3. All operations will be performed in accordance with the Oregon Forest Practices Act as they relate to the use and handling of chemicals.
