# Weyerhaeuser Springfield Area Noxious Weed Targets of Opportunity

Date: 1/12/2011Attn: Marvin Vetter

RE: Hand Backpack Spray Operations Written Plan.

Legal Description: specified Weyerhaeuser ownership in Lane County

Unit #: 1

Stream (s) name: various

The attached plat shows Weyerhaeuser ownership in the indicated sections where noxious weed control ground backpack spraying is planned. The primary target will be scots broom. Additional target species are invasive grasses such as false brome and pampas grass; Himalaya Blackberry, Meadow Knapweed and Japanese knotweed. The chemical glyphosate will be used. In roadside treatments aminopyralid may also be used. Water will be the carrier. A surfactant may be added. Treatment will primarily be along roadsides and on the fringes of young plantations.

No herbicides will be applied directly within 10 feet of type F and D streams, lakes, significant wetlands, or other areas of standing open water larger than one quarter acre at time of application. All vegetation required to be protected by the water protection rules within the riparian management areas will be protected. No vegetation will be treated within buffer strips left during logging.
