Re: Written Plan for 2011 Operations

Seneca Jones Timber Company herein submits a written plan for operations near a resource protection area. In accordance with the Oregon Forest Practices Act, these operations shall provide equal or better protection for the environment while enhancing effectiveness of forest management operations and achievement of the desired future condition. This written plan is based on the following information:

Type of Operation	Manual Herbicide Application
Unit	Fish Flat
Legal Description	T16S, R7W, Section 30 & 31
Unit Size	9 acres
Reason for Plan	Operation within 100' of type 'F' class stream

Information:

Lake Creek flows on the north and west side of our herbicide treatment area as seen on the attached map. The foreman will be directed to batch 100 feet away from Lake creek. This specific resource protection area is identified on the attached map. This stream is classed as a Large stream, in this area. Seneca plans to apply herbicides adjacent to but no closer than 10' of the indicated watercourse, allowing this buffer to protect the stream from any potential drift or error of application and maintain shade on the watercourse. Therefore, Seneca will not directly apply herbicides in the buffer zone. This vegetative release operation will utilize soil and foliar active herbicides primarily for control of herbaceous vegetation and brush.

The protection of this stream zone will be ensured by Seneca's continued dedication to the proper application of herbicides through the following practices. Prior to application a Seneca representative will relay the information included in this written plan to the applicator. This information will include a thorough review of the stream zone and the 10' no spray buffer zone as well as property line locations. Prior to and during the application period the applicator will take continuous weather measurements to assess risk and continued plan success. These stream zone protection measures are consistent with best management practices and will not affect any of the required components of the riparian management zone.

In closing we believe these measures will benefit both the environment and the operations of Seneca Jones Timber Company. If there are any concerns or more appropriate measures to be considered, please telephone our office at 541.461.6245 respectively. Otherwise, we will anticipate your approval of this measure and proceed as indicated during our operations.

Sincerely,

Mike Emmons

Mike Emmons Silviculture Forester
