Paul,

I am writing this letter to help answer any questions you may have in regards to the attached notification of operations. As the notification shows I intend to perform a site release spray application on the subject property.

As we discussed on the phone on August 11th, 2011 we will not be spraying or mixing chemicals within 100' of any water on this property. I will install a minimum 10' buffer along any small non-fish creeks within my unit. I will also install a minimum 60' no spray buffer along any type F, or D streams within my unit. Special care will be taken to keep products out of the water.

Products to be applied may include Glyphosate, Triclopyr, Imazapyr, and Metsulfuron Methyl. All products will be applied in accordance with the label, and in compliance with the Oregon Forest Practices Act.

This letter addresses all of the concerns I can identify at the moment. I appreciate your attention in this matter. If you have any questions or concerns please let me know, and I will be happy to address them.

Sincerely,

Shane Sutton
Forester
