Please describe the intent of the operation and any other information that may be relevant to the Forest Practices Forester.  
APPLICANT REMARKS:

I plan to target Bigleaf Maple clumps that are sprouting up throughout the 2 units. I will be using a hack & squirt method. On larger clumps I may use a saw to open up the outside edges of the clumps. These stems will then be treated, and we will reach into the clumps and treat the remaining stems. I will be using Imazapyr in a 50% mix with water. Chemical will be applied with hand held squirt bottles. Chemical will not be applied in areas in or over any water. Chemical will not be mixed within 100' of any water. All products will be handled and applied in accordance with the label and in compliance with the Oregon Forest Practices Act.
