recorded. All information must be recorded within 30 days following
the pesticide application.

WRITTEN PLAN OF OPERATION FOR AERIAL HERBICIDE APPLICATION

Weyerhaeuser Company is planning aerial broadcast spray applications targeting woody vegetation, broadleaf and/or herbaceous vegetation near protected resources. This letter is our submission of a written plan of operation for activities within 100 feet of protected resources. The attached plat shows the unit boundaries and resources to be protected. Chemical will not be mixed, handled or staged with 100 feet of protected resources.

No herbicide will be directly applied within 60 feet of the high water mark of any protected resource defined as F or D stream, lakes, significant wetlands and other areas of standing open water greater than one-quarter acre at the time of application. No treatment of timbered buffers left during harvest within 100 feet of protected resources will be done. All application will be done in compliance with the Oregon Forest Practices Rules and label instructions. The helicopter pilot will have a current map and/or aerial photo showing locations of the unit boundaries and resources requiring protection. Application of herbicide within the 100 ft adjacent to the protected resources will be flown parallel to the stream.

Unit #: 2700-BREEDON SHOVEL

Legal Description: 8-205-4W

Stream & Classification: SF STREAM

Sincerely,

Tiffany Roddy, Forester
