Signed by: Michael S. Williams for Land Owner

Notification Comments: Applicant Remarks: Deadwood Creek is the only type F stream in close proximity to the operation, and it is more than 100 feet away. No part of the operation is located on HLHL slopes within the Marchioli Drainage (refer to map). Deadwood Creek Rd is a low volume count road (<500/day) and not considered to be an HLHL issue. Drainage 2 (see map) was reviewed by an independent Certified Engineering Geologist in association with the "Lake Creek Deadwood" operation (2011-781-00318) and determined to not have any retention restrictions. Other than the aforementioned Deadwood unit (which is more than 300 feet away), there are no green-up restraints associated with this operation. Roads needed for this operation are accounted for in the aforementioned 00318 Notification.

Unit 1 of 1 Start: **07/01/12** End: **12/31/12**

Notification Comments: Applicant Remarks: Unit configuration was designed to avoid HLHL areas within the Marchioli Drainage (refer to map). The Johnston Creek side of th unit does not have any known restrictions associated with operations on HLHL. Other than the recently submitted "Lake Creek Ridge" Notification (2012-781-00069) that is more than 300 feet away, there are no green-up restraints. Roads needed for this operation are accounted for in association with Notification 2011-781-00317, which has been continued into 2012. Total acreage shown on page 2 includes the wildlife leave tree area. With respect to streams, type F designation is based upon ODF's stream layer, as well as ODF's Fish Model Habitat.

Notification Comments: This Notification is for a county wide storm damage repair on roads managed by the Oregon Department of Forestry. Most work not considered routine maintenance includes removal of debris flows that deposited on ODF managed roads. Much of this work is considered 'emergency' in nature and must be completed ASAP as to avoid resource and infrastrucutre damage.
