Re: Written Plan

Dear Mr. Hall:

In accordance with the administrative rules of the Oregon Forest Practices Act, this letter constitutes the written plan for operations near the protected resource(s) identified below:

Operation Name/Activity: "Long Spur H&S" – Manual Application
Notification Number: Not Yet Assigned
Legal Location: T.18S R.9W Sec. 24
Protected Resource(s): Waite Creek (Med type F) and tributaries (Med/Sm type F)
Waite Creek NSO

In an effort to control competing vegetation and promote conifer plantation growth, Rosboro intends to treat various species (namely big leaf maple). This will be a ground-based "hack and squirt" operation.

Treatment will likely occur within 100 feet of Waite Creek and associated tributaries, but will stay outside of the overstory retention areas associated with the respective RMAs. Chemicals will be applied in accordance with respective product labels and will not be stored, mixed or batched within 100 feet of the noted waters.

With respect to the Waite Creek NSO resource, its current location is more than ¼-mile away from the operation. As such, there are no special protection measures warranted at this time.

The contents of this written plan are expected to comply with the requirements for the operation adjacent to the disclosed protected resources, and the protection measures described herein are believed to achieve the objectives of the Forest Practices Act. Please let me know if you have additional questions or concerns.

Sincerely,

Michael S. Williams
Resource Forester
