TO:

Notification of herbicide applications:

We have completed our shoulder spraying with the exception of Territorial Highway and all of our ramps on I-5, I-105 and Beltline.

We are going to begin making applications on June 26 2011 to noxious weeds, grasses and brush on the shoulders, around structures, curves and intersections where needed. This will be done on Highway 36 so that we can continue with our commitment to the 60% reduction plan and still maintain a safe highway system while ridding our highway shoulders of invasive species.

The herbicide application schedule is tentative and is subject to change time due to weather, equipment breakdowns and availability of product.

For daily information call:

ODOT Herbicide Application Information Line at 1-888-996-8080.
